

1.) Login Page:

The data fields we want in login page is

- User-Name/Email = A unique identifier
- Password = There account password

2.) Signup Page:

Sign-Up Page will be used when a new user will register on our application. In this case we want basic information:

- userName – The name of the account that user want to keep
- email – Email of the user. Must be Unique i.e. no existing account should have the same email.
- Password – Account password that the user will use to login. This will be hashed before storing in the Database.
- pfp – A profile picture like we have in social media applications like Instagram, Facebook etc. .

eg :

- role – The purpose of the user i.e. enum [Rider | Organizer | Sponsor]

These are the basic details of the user we want when signing them up. In the next page we ask for “Role-Specific” details.

1.) Rider:

- fName – First Name of the rider
- mName – Middle Name of the rider (if applicable)
- lName – Last Name of the rider
- age
- city
- banner – An image like youtube banner.
- socialLinks – Links of Rider’s social media accounts like Instagram, FaceBook, Youtube etc. .
- bikes – An array of bikes which the rider owns. They can select from the dropdown we will provide to them. This information will be used when suggesting them rides.
- ridingStyle – An array of preferred riding style by the rider, for eg some rider love cruising and off-roading while some can love adventure and highway rides etc. .
- bio – A small description of the rider (Max 250 characters supported)

2.) Organizer:

- banner – An image representing their brand. This will be asked by the user.
- name – Name of the organization
- description – Description of the company
- socialLinks - Instagram, facebook handles of the organization
- website – Website URL of the organization
- GSTIN – GSTIN number of the organizers. This is used to verify the organization

3.) Sponsors:

- brandName – Name of the company
- banner – Same as that of organizer
- website – Same as that of organizer
- description – Same as that of organizer

Flow-Chart of Sign-up:
